Data Flow Task: DimDate

The diagram shows a Data Flow Task named 'DimDate'. It starts with a 'Date' source component, which outputs 3,652 rows. These rows pass through a 'Sort' component and then a 'Derived Column' component, both of which also show 3,652 rows. Finally, the data is loaded into a 'DimDate' target component. All components have green checkmarks indicating successful execution.

Data Flow Task: DimGeography

The diagram shows a Data Flow Task named 'DimGeography'. It starts with a 'Customer' source component, which outputs 59 rows. These rows pass through a 'Sort' component and then a 'Derived Column' component, both of which also show 59 rows. Finally, the data is loaded into a 'DimCustomer' target component. All components have green checkmarks indicating successful execution.

Data Flow Task: DimArtist

The diagram shows a Data Flow Task named 'DimArtist'. It starts with two source components: 'Artist' (275 rows) and 'Album' (347 rows). Both feed into 'Sort' and 'Sort 1' respectively. The outputs of 'Sort' and 'Sort 1' are joined by a 'Merge Join' component, which outputs 347 rows. This output then feeds into a 'Derived Column' component, which finally outputs to the 'DimAlbum' target component (347 rows). All components show a green checkmark, indicating successful execution.

Data Flow Task: DimSong

The diagram shows a Data Flow Task named 'DimSong'. It starts with three source components: 'Track' (3,583 rows), 'Genre' (25 rows), and 'Media Type' (5 rows). 'Track' feeds into 'Sort', 'Genre' into 'Sort 1', and 'Media Type' into 'Sort 2'. The outputs of 'Sort' and 'Sort 1' are joined by a 'Merge Join' component, which outputs 3,583 rows. The output of 'Sort 2' is joined with the output of the first 'Merge Join' by a second 'Merge Join' component, which outputs 3,583 rows. This output then feeds into a 'Derived Column' component, which finally outputs to the 'DimSong' target component (3,583 rows). All components show a green checkmark, indicating successful execution.

Data Flow Task: DimPlaylist

The diagram shows a Data Flow Task named 'DimPlaylist'. It starts with a 'Playlist' source (18 rows) connected to a 'Sort' task. The 'Sort' task is connected to two destinations: 'DimPlaylist' (18 rows) and 'Derived Column' (18 rows). The 'Derived Column' task is also connected to 'DimPlaylist' (18 rows). The task is running in debug mode, and the progress bar shows 80% completion.

Data Flow Task: BridgeTable

The diagram shows a complex Data Flow Task named 'BridgeTable'. It involves multiple sources: 'DimPlaylist' (18 rows), 'PlaylistTrack' (8,715 rows), 'PlaylistTrack1' (8,715 rows), and 'DimPlaylistLong' (3,583 rows). These sources feed into a series of 'Sort' tasks (Sort 1, Sort 2, Sort 3, Sort 4, Sort 5) and 'Merge Join' tasks (Merge Join 1, Merge Join 2). The task is running in debug mode, and the progress bar shows 80% completion.
